

**TABLE 2. General Statistics by Geographic Areas and Type of Operation:
1963 and 1958-continued**

Industry code, industry, geographic area, and type of operation	1963											1958		
	Establishments		All employees		Production, development, and exploration workers			Value added in mining (\$1,000)	Cost of supplies etc. and purchased machinery installed	Value of shipments and receipts (\$1,000)	Quantity of primary products (1,000 short tons)	Capital expendi- tures (\$1,000)	All employees (number)	Value added in mining (\$1,000)
	Total (numb- er)	With 20 employ- ees or more	Total (number)	Payroll (\$1,000)	Total (numb- er)	Man- hours (1,000)	Wages (\$1,000)							
Type of Operation	1441 - SAND AND GRAVEL INDUSTRY													
Construction sand and gravel subindustry: Producing establishments total													34,128	
Bank:													645	
Mining with preparation:													3,843	
Crushing only													5,305	
Washing and other preparation													2,437	
Dry pit and wet pit										607.53			76	
Wet pit:										12.85				
Mining with preparation:										7.627				
Crushing only										5.462				
Washing and other preparation										52.58	534.88		3,051

(NA) Not available. (X) Not applicable.

(D) Withheld to avoid disclosing figures for individual companies.

Standard Notes; - Represents zero.

n.e.c. Not elsewhere classified

General statistics for all States in the Sand and Gravel Industry, except Alaska and Hawaii, are shown separately in this table. For 1963, the number of establishments in Alaska was 11 and total employment was in the range 50-99; for Hawaii, the number of establishments was 6 and total employment was in the range 10-19. For sand and gravel mining in manufacturing establishments a number of States are not shown separately in this table to avoid disclosing figures for individual companies or because of the relatively small size of the statistics. Such States are shown below for 1963, with the number of establishments in each State (and in parentheses the number of employees or employment size range): Maine 6 (0-4); New Hampshire 1 (0-4); Vermont 4 (0-4); Rhode Island 1 (0-4); North Dakota, 3 (10); South Dakota 5 (11); Nebraska 6 (7); Maryland 7 (98); West Virginia 5 (11); South Carolina 7 (2); Georgia 12 (5-9); Florida 20 (20-49); Kentucky 9 (10-19); Mississippi 1 (0-4); Arkansas 8 (12); Louisiana 10 (7); Montana 4 (6); Wyoming 6 (13); Oregon 15 (50-99); and Alaska 2 (20-49).

For sand and gravel mining in manufacturing establishments includes the estimated value of sand and gravel produced and used in the same establishment in making concrete block and block, ready-mixed concrete, and other manufactured products.

Represents the product indicated by the name of the industry or subindustry. For the mineral industries represents net shipment (gross shipments less sand and gravel received for preparation). For sand and gravel mining in manufactures, represents gross shipments plus production of sand and gravel for use in the same establishment in the manufacture of concrete brick and block, ready-mixed concrete, and asphalt and tar paving mixtures.

Figures for the Industrial Sand, N.E.C. Subindustry are included with those for the Construction Sand and Gravel Subindustry.

Represents the Glass Sand, Molding Sand, and Industrial Sand, N.E.C. Subindustries. No establishments in the Glass Sand Subindustry were reported for New England in 1963.

Represents the Glass Sand and Molding Sand Subindustries. No establishments in the Molding Sand Subindustry were reported for 1963.

Number of production, development, and exploration workers was estimated from reported figures for man-hours. No data were obtained on other employees at such operations, hence, the same figures are shown for production, development, and exploration workers and for all employees.

Excludes data for Hawaii.

Not entirely comparable with the 1963 figures, since the classification of certain establishments was changed after 1958 from sand and gravel to crushed stone.

Includes data for separately reported central offices and related facilities. These were not distributed by detailed types of operation.

Includes data for unspecified types of operation for which 2,955 employees were reported and value added amounting to \$36,330 thousand.

¹²Not shown since the cost of supplies, purchased fuel and electric energy, contract work, and purchased machinery installed exceeded capital expenditures.
